OWNERS MANUAL - S&S® KN, P, AND SH(SERIES ENGINES OIL RECOMMENDATIONS S&S recommends synthetic engine oil such as S&S Premium Synthetic 20W50. However a premium petroleum based engine oil such as S&S Heavy Duty 20W50 or 25W60 is acceptable. S&S recommends using S&S oil, as it has been designed specifically for our engines.

Harley-Davidson F-150 vehicles are equipped with high performance tires. When first driving the vehicle after it has been parked, you may experience a temporary ride disturbance. This is a characteristic of the tires used on the Harley-Davidson vehicles and should be no reason for concern. The condition should correct itself within 10–15 miles of

Installation Instructions FOR HARLEY-DAVIDSON For EVO / 5 Speed and Twin Cam Harley-Davidson rings (inside and outside) Figure 1 3.4 With motorcycle in neutral, pull both the shafts out and simultaneously push the OEM outermost gears in until seated completely to expose the

The oxygen sensor is located inside in the exhaust pipe, and it is used to detect rich or lean mixtures. The sensor is an essential component in the emissions control system as it transmits data to the engine's ECM. The primary function of the oxygen sensor is to help the engine operate as smoothly as possible by detecting and using fuel

This Nascar Type Setup produced by Perry Kime FLO Headworks High Performance Engine Kit for Harley-Davidson Twin Cam 88/95 R&D on the heads started in April 1999. The start looking inside. The top end was pretty straight forward but this Twin Cam stuff is lot different. We meticulously remove and replace

FINALLY a CURE for the always leaking 4 speed tranny, not a Band-Aid, a REAL Duguay (saddlebagrail) Hi Everyone I am starting this new articles concerning the famous 4 speed transmission made by Harley from the early Knucklehead to the end of the Shovelhead era, those types of After the inside of the bushing is machined, I still

ULTIMA® #53-644 Programmable Digital Ignition System • DESCRIPTION The Ultima® Digital Ignition is designed to provide the correct curves and total timing for Ultima engines and other larger cubic inch or high performance engines. These units will also replace the OEM HD® factory ignition module and sensor used on 1983 and later Harley-Davidson EVO motors.
